

Bellagio

A memorable panorama is obtained when elements of singular beauty are combined together. Bellagio, inspired by the harmonies of the lake panorama, is the result of careful combinations and stratifications of colors and materials, in which each element maintains a precise identity, which contributes to the richness of the whole.

The desktop, in combination of thick wood and ivory-colored leathers for the desk pad, seems to float with respect to the risers and the modesty panel, completely covered in the same shade of leather. This levitation effect is obtained thanks to the rectangular ring in brass-plated steel / burnished metal, which becomes an element of detachment and union at the same time.

The metal finish itself, a distinctive feature also recurs along the head of the modesty panel, becoming a structural element.
