Cubo

design by SI DESIGN

A light, simple bookcase that takes on uniqueness and personality thanks to the combinable colour tones of its metal structure and its cases and shelves. The modular and sectional system, accompanied by the four heights of the side panels and the rear side panels, allows you to freely design compositions with open and closed niches.

In addition to the typical functions of shelving – namely, containment and storage – the Cubo also divides and separates environments, with each side being carefully finished down to the smallest detail.
